

Morehouse College Minority Energy Science Research and Education Initiative (\$2,500,000). I would ban earmarks as we know them, but as long as these earmarks are available, I'm going to apply for them in an effort to pursue federal funding opportunities for my district. For non-defense projects in the current earmarking system, I work closely with local governments, civic organizations, non-profits and business development authorities to identify and prioritize projects important to local communities in Georgia's Eighth Congressional District (and sometimes elsewhere). I only request funds for projects authorized by law for federal funding and do not do so for private parties or entities. This project will increase the number of minority research scientists engaged in National Nuclear Security Administration activities. This project is valuable use of taxpayer funds because it will increase the number of Americans working to strengthen U.S. economic competitiveness and improve our quality of life through scientific and technological innovations. Beneficiary: Morehouse College, 830 Westview Drive S.W., Atlanta, GA 30314.
